Project experience:

Project name:	Promtransinvest
Involvement duration:	2006-2008
Project role:	Writing modules (“green card” and voluntary insurance) that confirm the civil liability of the vehicle owner to third parties in case of violation. My role in the project was to create forms that collected data and sent it to SQL Server 2000, as well as to create a reporting system using Crystal Reports
Project team size:	15
Project description:	Voluntary insurance
Tools and technologies:	.Net 1.1, Crystal Reports, SQL, FoxPro Server Business Intelligence Development Studio, Resharper, MS SQL Server 2000, Microsoft Visual Studio 2003

Project name:	Data Networks
Involvement duration:	2008-2010

Project role:	www.dotcom-monitor.com. Scripts for HTTP-requests monitoring, XML-reports (http://dotcom-monitor.com/XML-report-service.asp).
Project team size:	25
Project description:	The XML Reporting Service (XRS) is a simple, flexible framework that provides an API for your real-time monitoring data through an HTTP request.
Tools and technologies:	C#, OQL, XML, XPath, .NET 3.5, Metrics.Net, Raygun, SOAP, REST API, Resharper MS SQL Server 2005, Microsoft Visual Studio 2008, TFS

Project name:	DotDigitalGroup
Involvement duration:	2012-2014
Project role:	<ul style="list-style-type: none"> • Development and support of cms platform dotEditor and dotCommerce for projects. • My role in the projects was to investigate problems, fix bugs, and expand the kernel. • (http://shoprush.com/, http://www.nicolefarhi.com/, http://www.blottshop.com/, etc.). • User Integration Department: • My role was to study various systems and integrate with third-party systems, databases or web services using .Net, ASP.NET, SQL Server 2008 R2, and then deliver the finished solution and support to the customer in the future. • (http://apiconnector.com/, http://developer.bullhorn.com/documentation, Oracle Siebel CRM, etc).
Project team size:	50
Project description:	dotCommerce is a UK based e-commerce and website design company with extensive experience in providing e-commerce website solutions. Integration experts, as well as experts in the newest (and new and future) development languages, we can integrate dotmailer into legacy systems. They can also adapt the API to work just the way you need it.
Tools and technologies:	Team City, Tortoisenvn, Raygun, Octopus Deploy, Resharper, WinDbg, TFS, Toggle, Trello, SQL Server 2008 R2, Microsoft Visual Studio 2010 C#, XPath, .NET 3.5, ASP.NET 4.0

Project name:	EPAM
Involvement duration:	2014-2016
Project role:	<ul style="list-style-type: none"> • Development and support of the ISAM project. • My role in the projects: forming tasks in the sprint with the client, participating in the ISAM team and meeting with other teams, discussing new modules, developing new functions and fixing bugs, maintaining project documentation, integrating between databases, delivering finished code to the client server
Project team size:	2000
Project description:	WKL-CTDC, Information Security Assessment Manager (ISAM) uses the ComplyTrack™ platform from Wolters Kluwer Law & Business, a leader in enterprise and risk management solutions for the healthcare industry. ISAM integrates the HITRUST Common Security Framework (CSF) with industry-leading risk assessment software that goes far beyond simple risk analysis, combining management-based assessments, multi-stage remediation, robust monitoring and intelligent analytics in one tool.

Tools and technologies:	ASP.NET MVC, knockout-3.3.0, Entity Framework 6.0, Resharper, Schema JSON, SQL Server 2008 R2, Microsoft Visual Studio 2013 C#, JavaScript, JQuery, T/SQL
Project name:	EPAM
Involvement duration:	2016-2017
Project role:	My role in projects: development of user interface functionality, deep refactoring based on design patterns, performance optimization, development of new functions and bug fixes, delivery of finished code on a client server
Project team size:	2000
Project description:	Cayman eDiscovery system helps lawyers process large amounts of data during legal retention. At this stage, lawyers have time to study materials related to this issue, if this is not the case. Manually this requires a lot of resources and tens of millions of dollars. EDiscovery systems increase material processing speed.
Tools and technologies:	ASP.NET MVC, backbone.js, Angular 1.6, NHibernate, StackExchange.Redis, Oracle 11g, ElasticSearch, Redis, Coherence C#, JavaScript, JQuery, PL/SQL

Project name:	OctopusLabs
Involvement duration:	2017-2019
Project role:	I am responsible for code review, participating in global cross-group meetings, architectural meetings. In addition, an important part of my work is monitoring risks and problems for projects and performing coding tasks.
Project team size:	200
Project description:	Octopus Investment is an investment company, the range of fund structures means that we can offer financing to companies of all shapes and sizes - from well-established enterprises to entrepreneurs with an idea that can one day change the world.
Tools and technologies:	ASP.NET MVC Core 2.0, Angular 4, StackExchange.Redis, MS SQL, Cosmos DB, Redis, Microsoft Visual Studio 2017, VS Code C#, TypeScript, LINQ, T-SQL
